What is Flick?

It's an app where you can find any student from the 5 college campus to watch a movie with! Just create a user profile, select your genres and request to watch a movie with someone. Once you get a match, you have a movie date planned! You can match with up to 5 people!

Target users:

5-College students, with potential to expand outward.

Difficulties:

Linking DJango user and Profiles,

Creating Matches based on a request being joined by other users

Future work:

Data auto import from IMDB database

Ticket booking
